Awful, raw game. Needs tons of polishing.. Good! Love that game. It's pretty meh. Hard as balls too.. nice game !. This is a lot more fun than i expected it to be. It is old school and it did take me a while to get used to the controls but i had a lot of fun. IT IS REALLY HARD and it actually tries to make me pay attention to the pattern the boss is moving in. 8/10 great game. yep its an old school NES/PC engine game alright with few stuff from sega gen shinobi 3 intros & stage's intro's

in this game you have to memorise whats coming in order to advance and you need some of those megaman/ninja gaidan/Shadow of the Ninja skills in order to beat the bosses since they give little room for you to hit them or guessing where to hit them rushing in the stage blindly is a death sentence since those 3 lives you have can easily be drained by small enemys.

i did run into some random bugs that gets you killed in the first section such as enemys & projectiles pops up on you from out of nowhere

the background stage is simple and well done with the word \u0633\u0648\u0642\u0642\u0642=shop it hints you that your playing in arabic country stage

overall i do recomand this game for the old school hardcore retro fans. The graphical style is a bit sloppy, but the game basically plays the way it appears to - like an old-school NES platform/action game with a ton of dying until you learn all the patterns.

If Strider NES was your cup of tea, this might be as well.

I like the concept, it seems like it has great potential to become an indie game. yep its an old school NES/PC engine game alright

Even for those who still miss their first Nintendo console and hum 8-bit tunes, this game is not worth any attention.. yep its an
